

How to read Graphic Novels

Even if you're not
a comic book fan...

Danièle Archambault, Ph.D.
www.DanieleBD.com

It's free
and open to
the public!

Graphic novels are everywhere these days. You find them in classrooms, in libraries, even on the required reading lists of college literature classes. Why is the world suddenly so fascinated by these comic books? **In this one-hour talk, Dr. Danièle Archambault will bring you on a guided tour of the world of graphic novels.** Find out about the history of graphic novels and the many genres in which they developed. Learn the literary and visual art techniques favored by an array of authors of various cultures and backgrounds. After the presentation, you'll go home with a list of suggested readings (fiction and non-fiction) and a whole new appreciation for the increasingly popular world of graphic novels.
